Game Description:

Space Killers is a Space-Survival game where the player must hold their own against a never-ending hoard of evil space aliens. The longer you try to survive, the more difficult it becomes!

How To Install:

Step 1:

Go to the directory on your computer where the setup files are placed and click on the “setup.exe” application.

setup	25/04/2013 14:29	Application	440 KB
-------	------------------	-------------	--------

From here, it should begin going into the setup

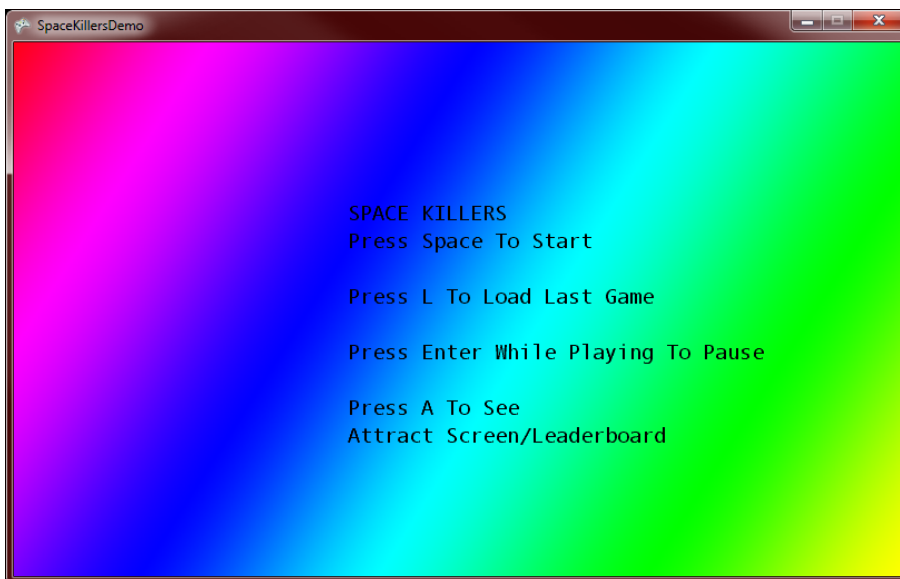

Step 2:

For Windows 7 users, you may receive the following text box:

This is perfectly normal. Just click on “Install” and the process should automatically begin

Step 3:

After that, it should automatically boot into the game, and putting a launchable executable in the same directory as the setup file.

Controls:

Keyboard Controls:

Arrow Keys – General Player movement.

ENTER Key – Pause the game. (Press P while in the pause menu to unpause)

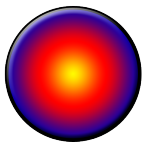

Esc Key – Exit the game at any time.

Gameplay:

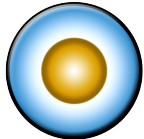

--Rules:

- The player must try and avoid contact with any enemy on screen. If they make contact with an enemy, the game is over.
- The timer counts down to zero. If it reaches this, the player gains a point and the game progresses to the next level.
- The objective is to survive as long as possible. The more levels you progress through, the higher your score.

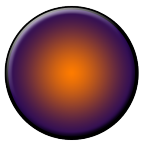

--Enemies:

Killer – These enemies follow you from the game start.

Master – These do not follow you from the start, but once you get close they will activate and start chasing you.

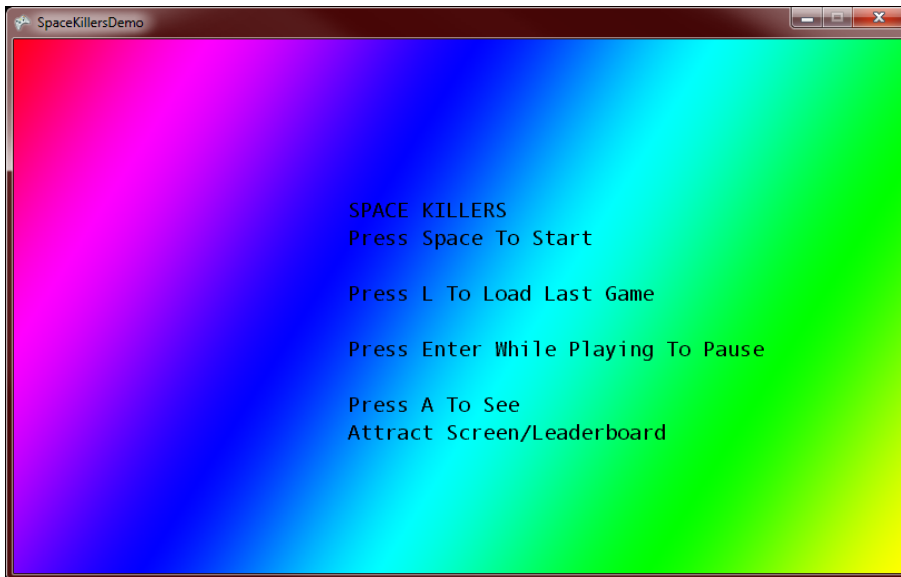

Drone – These do not move, but will kill you if you touch them.

Mincer – Like the Master, if these activate they will start chasing you. But if they make contact with anything, the game will end.
